教師研究績效分為工程、管理、資訊、人文、電通、醫療六大類，採分類評比，教師如欲跨所屬學院參與其他類別之評比，需經兩類雙方召集人同意。
Faculty Research Performance is divided into six categories: Engineering, Management, Informatics, Humanities, Electrical and Communication Engineering, and Medical. Classified evaluations are adopted. If teachers want to participate in evaluations outside their designated category within the college, they must obtain consent from both sides.

5. 學術倫理宣導 Academic Research Ethics Information

1 完成學術倫理教育訓練 Finish Academic Research Ethics courses

根據國科會與校內規定，新進教師須完成學術倫理教育訓練。可利用教育部 AREE 線上學習平台研習相關課程。研發處會協助申請帳號，帳號使用請參閱附件。

According to NSTC and YZU regulations, “new faculty have to finish 6 hours academic research ethics courses.” You can use Taiwan Academic Research Ethics Education (AREE) website to learn courses. The R&D office will set up the account. For how to use AREE, please refer to the attached document.

5. 學術倫理宣導 Academic Research Ethics Information

2 必要時辦理研究倫理審查 Conduct research ethics review if necessary

研究對象若涉及「人」(包含人體及人類研究)，在進行研究前必須辦理研究倫理審查並取得執行同意。社會科學研究雖不直接與「人」類研究參與者有接觸，但還是有可能使研究參與者的心理或精神間接受到影響，仍應於計畫執行前繳交已送研究倫理審查之證明文件。

Research subjects involving "humans" (including the human body and human research) must undergo research ethics reviews and obtain consent before conducting research. Although social science research does not directly contact the "human" research participants, it is possible that the research participants may be indirectly affected psychologically or spiritually, and the supporting documents that have been applied for research ethics review should be submitted before the project starts.

5. 學術倫理宣導 Academic Research Ethics Information

3 謹慎投稿避免誤投期刊 Submit Carefully, Beware of Predatory Journals.

伴隨開放取用(OA)出版的興起，掠奪性期刊和出版商也日益增加。近年來，有越來越多的研究者上當受騙。當您收到不明期刊或出版商的邀稿，請小心求證，以確保您的研究將發表在值得信賴的期刊。AREE彙整了掠奪性期刊的特徵，可作為研究者在投稿時之參考。

The rise of open access (OA) publishing has been accompanied by an increase in predatory journals and publishers. In recent years, more and more researchers have been cheated. When you receive an invitation from an unknown journal or publisher, be careful to verify that your research will be published in a trusted journal. The AREE website collates the characteristics of predatory journals, which can be used as a reference when submitting.
